

IN-HOUSE FASTENER PAINTING

Bryer has added a full service paint line in its Auburn, WA facility! This new capability allows us to custom paint any fastener to match your requirements. If it's a standard color just let us know the panel manufacturer and color name. If you have a custom color we can still paint your fasteners to match, simply send us a sample chip and we can match it in-house. We use Millennium long-life paint finish to ensure that our screws will retain their vibrant color as long as possible. In addition, our new paint line allows us to vastly improve the turn around time for painted fasteners. Instead of the usual 5 to 6 days **Bryer's standard lead-time is 2 days!!!** Bryer also will be stocking many of the most popular fasteners and colors pre-painted and ready for same-day shipment. If you need a custom painted fastener and you can't wait 2 days, ask about our Sonic Service.

Standard 2-Day - Order any painted fastener by 10:00am pst and your order will ship 2 days later for any in-stock part. An order that comes in Monday morning by 10:00 will ship by Wednesday. Some restrictions apply, call customer service for details.

Sonic Same Day - Order by 10:00am pst and your order will paint & ship out that afternoon GUARANTEED! Some restrictions apply, call customer service for rates and details.

Sonic Next Day - Order by 10:00am pst and your order will paint & ship out the following day GUARANTEED! Some restrictions apply, call customer service for rates and details.

The Guarantee - If we fail to ship your **sonic** painted fastener order on time we will not only refund the sonic service charge but also give you \$25 off your next accessory order.
